SUMMARY

As a recent graduate of Kenzie Academy and an aspiring software engineer, I am driven by a passion for technology and a strong desire to create innovative solutions that improve lives. With a solid foundation in full-stack development, cloud computing, and backend development, I am eager to work alongside experienced professionals to further hone my skills and contribute to meaningful projects. My commitment to continuous learning has led me to actively engage in personal projects, open source contributions, and staying up-to-date with industry trends. I am excited to join a team of like-minded individuals and make a positive impact in the software engineering field.

EDUCATION

Backend Software Development Certificate, Co-Developed with Amazon Sept. 2021 - Nov. 2022
University of Southern New Hampshire, Kenzie Academy

Coursework: Software Engineering, Algorithms and Data Structures, Computer Architecture, Networks, Operating Systems, Backend/Frontend Development.

Bachelor of Science, Computer Science Jan. 2023 - Jan. 2025
Arizona State University

SKILLS

Programming Languages	Java, JavaScript, HTML, CSS, C/C++
Tools/Technologies	AWS, AWS lambda, Docker, SpringBoot, React + React native, ThreeJS, Vite, Tailwind

PROJECTS

Web Developer / Personal Project March. 2023 - April 2023
Space Snippets

- Created web application to make learning about the universe fun through images from Nasa
- Utilized React and Vite to create a responsive web design on any device
- Integrated AWS to host a server-less backend API

Personal Project Jan. 2023 - Feb. 2023
Autumn's Image Sender

- Designed an application to send random photos of my cat Autumn to your phone!
- Utilized AWS Lambda to host a serverless function to reduce service costs and pay per request.
- Integrated Twilio API to process requests from phone numbers and then communicate with lambda

Software Developer Sept. 2022 - Oct. 2022
OnTheWay

- Developed a full-stack application that manages a businesses inventory.
- Created a Backend API using Springboot utilizing DynamoDB to store product information and data
- Automated Integration tests utilizing the CI/CD pipeline, and created unit tests utilizing JUNIT.
- Integrated Lambda service to process data in real time and recommend inventory orders daily.
- Designed and built the Frontend interface using HTML and CSS
- Recognized as number 1 most useful real world project in the class.

EXPERIENCE

Barista Oct. 2018 - Present
Starbucks *Rancho Cucamonga, CA*

- Communicated effectively to resolve customer issues and concerns, and worked in a team to complete tasks before the deadline. Crafted drinks with extreme detail and in a timely manner for customers.
