SUMMARY

I am an aspiring software engineer, and current graduate of Kenzie Academy. I am always eager to learn about tech and enjoy working with passionate people who have more experience as software engineers. I love helping people and desire to create solutions for others to help better their lives. I am interested in working more on cloud computing, and focusing on backend development. While I have no professional experience, I continue to learn in my free time, working on personal projects, and contributing to open source projects.

EDUCATION

Backend Software Development Certificate, Co-Developed with Amazon Sept. 2021 - Nov. 2022
University of Southern New Hampshire, Kenzie Academy

Coursework: Software Engineering, Algorithms and Data Structures, Computer Architecture, Networks, Operating Systems, Backend/Frontend Development.

Bachelor of Science, Software Engineering Jan. 2023 - Jan. 2025
Arizona State University

SKILLS

Programming Languages	Java, JavaScript, HTML, CSS, C/C++
Tools/Technologies	AWS, AWS lambda, JUnit, Mockito, Docker, SpringBoot, RESTful

PROJECTS

Personal Project Jan. 2023 - Feb. 2023
Autumn's Image Sender

- Designed an application to send random photos of my cat Autumn to your phone!
- Utilized AWS Lambda to host a serverless function to reduce service costs and pay per request.
- Integrated Twilio API to process requests from phone numbers and then communicate with lambda

Software Developer Sept. 2022 - Oct. 2022
OnTheWay

- Developed a full-stack application that manages a businesses inventory.
- Created a Backend API using Springboot utilizing DynamoDB to store product information and data
- Automated Integration tests utilizing the CI/CD pipeline, and created unit tests utilizing JUNIT.
- Integrated Lambda service to process data in real time and recommend inventory orders daily.
- Designed and built the Frontend interface using HTML and CSS
- Recognized as number 1 most useful real world project in the class.

Software Developer/Scrum Master Jul. 2022 - Aug. 2022
Arrow

- Managed a team of 3 and developed an application that sends preconceived messages for birthdays.
- Delegated tasks to teammates, supported them on difficult tasks, and organized stand-ups
- Integrated Springboot as the Backend API, utilized DynamoDB to store messages for user, and built the frontend interface using HTML and CSS

EXPERIENCE

Barista Oct. 2018 - Present
Starbucks *Rancho Cucamonga, CA*

- Communicated effectively to resolve customer issues and concerns, and worked in a team to complete tasks before the deadline. Crafted drinks with extreme detail and in a timely manner for customers.
